EDUCATION

California State University, Long Beach – (CSULB) **Cumulative GPA: 3.07**
Bachelor of Science in Computer Science **Major Specific GPA: 3.35**

TECHNICAL SKILLS

- **Programming/Scripting Languages**: Java (proficient), Python (basic), Kotlin (basic), JavaScript (basic), C/C++ (proficient), SQL(proficient)
- **Frameworks & Tools:** JIRA, Agile (SCRUM), Git, Linux

PROJECTS

Pong Game – Personal Project **August 2019**

- Designed and implemented an old school pong video game using C++ and the openGL framework.
- Technology stack used: openGL, C++

Restaurant Roulette – CSULB **December 2018**

- Created an Android application to help people/couples decide what to eat. The application randomly chooses a food destination from the 20 closest options at the user's current location
- Technology stack used: Google Maps API, Android Studio, and Java

NHL Database – CSULB

- Created a Java program to manage and track NHL league information. The JPA project tracked and managed players, teams, stadiums, and games
- Technology stack used: Java, Java Persistence API

Mapp – Android Application – CSULB

- Created an Android application to help new or current students find building, structures, and conveniences on the CSULB campus via an interactive searchable map. Students can also maintain their schedule, submit reports about buildings and other things so maintenance workers can fix them, see street view pictures around campus, like Google's street view, and lastly have directions drawn on the map.
- Technology stack used: Android Studio, Java, Google GPS location API, PanoramaView API, Firebase

ACADEMIC COURSEWORK

- Algorithms, Computer Architecture, Cyber Security, Data Structures, Databases, Digital Logic and Assembly Programming, Object Oriented Design/Programming, Operating Systems, Mobile Application Development, UI Design, Networking and Distributed Computing, Organization of Programming Languages
