

SKILLS

Java 13+	3+ yrs
Spring Boot	3+ yrs
React	6+ mo
SQL	3+ yrs
Kafka	2 yrs
Python	1+ yrs

TOOLS

Intellij	3+ yrs
NeoVim	1+ yrs
Git	4 yrs
Atlassian Suite	4 yrs

EDUCATION

08/15/2022 - 05/15/2024

M.S. Computer Science
C.S.U., Long Beach **GPA: 4.0**

Computer Science Master's Program with thesis on AI/ML. I graduated 2nd in my class and introduced a novel dropout out technique in my thesis, 'Sector-Wise Dropout'.

08/15/2015 - 05/15/2020

B.S. Computer Science.
C.S.U., Long Beach

General computer science education, concluding with a 1 year project. My project was a Google Maps clone strictly for the school campus, including features such as authentication, path finding, interactive map, "street views".

CLAYTON ASADA

PROFILE

I'm a highly motivated, self-driven software engineer with 4 years of professional development experience. My current role has recently expanded from predominently Java Spring Boot development to also include Javascript/Typescript React development. On the backend, I develop and maintain highly available microservices which process million of events daily. On the frontend, I create and maintain common components to be used throughout multiple user-facing products.

WORK EXPERIENCE

Java Developer 03/15/2021 - Present
Tata Consultancy Services

Drive progress in a company-wide modernization and migration project leveraging new technologies, language features, and frameworks.

- Create, enhance, and maintain common React components for use across multiple client-facing products
- Enhance and maintain current applications created by my predecessors to meet new business goals, fix implementation errors, and mitigate vulnerabilities
- Design, develop, and maintain new applications, including database tables, for AWS cloud deployment
- Work directly with Experian clients and their technical teams for API integration, testing, and go-live

Technology Stack:

Java, Spring Boot, React, AWS, Docker, MySql, Kafka, OracleDB, Unix

Achievements:

- Guided by user feedback, I created a feature to help users quickly identify the topics and context of their next task, which improved their efficiency and task throughput.
- My Hackathon idea, inspired by customer conversions, lead to implementation, completed by me, which increased yearly revenue by $800,000 (16%)
- Designed and developed 13 new microservices to completely replace legacy systems
- Performance improvements of two legacy applications, resulting in 50% reduction in latency

Electrical Systems Technician 07/-1/2012 - 09/01/2015
United State Marine Corps
